Subject: MGII Fish Passage Field Tour - 9/4 and 9/5
Attachments: 20190904_Fish Passage Barrier Tour Itinerary.pdf

All –

Attached is the itinerary for the fish passage barrier tour for September 4th and 5th. It is shaping up to be a great tour with lots of informational stops and discussions.

The already anticipated participants are listed in the itinerary. However, we welcome others from the ESA IC Fish group. Please let us know if you plan to attend by the end of this week, so we can plan for transportation and logistics. A few notes regarding the tour –

- Plan to meet at the Midas Gold office at the site (past the YPP, follow the signs). Please ask if you need further directions.
- Water and bathroom facilities will be available at the office on site, but please plan to bring your lunch both days.
- Plan for proper PPE – steel-toed boots, hard hat, and safety vest. Midas Gold has visitor hard hats and vests if needed. A safety briefing will be provided on the first day.
- If you want to attend, please plan for your own accommodations. Options include the Yellow Pine lodge or camping if you plan to stay for both days.
- Water levels are pretty low this time of year, so hiking boots or knee boots should suffice.

Please let Dan Kline or myself know if you would like to attend and if so, let us know if you have any questions regarding logistics or directions.

As FYI in case you cannot attend – an agenda item for the September ESA IC meeting is to provide a summary of the tour.

Thanks!!

E. Aylin Lewallen
